

Protect what you value this festive season

Gifting presents with batteries?

- Choose trusted sellers and brands.
- Use batteries and chargers that match up with the maker's advice and compliance marks.
- Don't charge batteries and devices on couches or beds. Choose solid, fire-safe surfaces.
- Once charging's complete, unplug right away.
- Don't leave batteries charging overnight or when leaving home.
- Don't charge e-bikes, scooters, or big battery toys inside. Charge outside, undercover out of direct sunlight and check for signs of damage or heat.
